# Google Maps Flutter

- Configuração do Ambiente
  - Configurar a API google_maps_flutter
    - https://pub.dev/packages/google_maps_flutter
    - Google Cloud https://cloud.google.com/maps-platform/.
    - Adicionar nas dependências o google_maps_flutter
      - Arquivo pubspec.yaml

Credenciais  Todas as APIs do Google Maps

Chaves de API

| Nome | Data da criação | Restrições | Chave | Uso com este serviço (últimos 30 dias) | Uso com todos os serviços (últimos 30 dias) |
|---|---|---|---|---|---|
| Chave de API 2 | 1 de out. de 2020 | Nenhuma | AIzaSyASdI...GbA94rdSFU | 0 | 0 |
| Chave de API 1 | 1 de out. de 2020 | Nenhuma | AIzaSyDPgs...iqxaaPOuso | 0 | 0 |

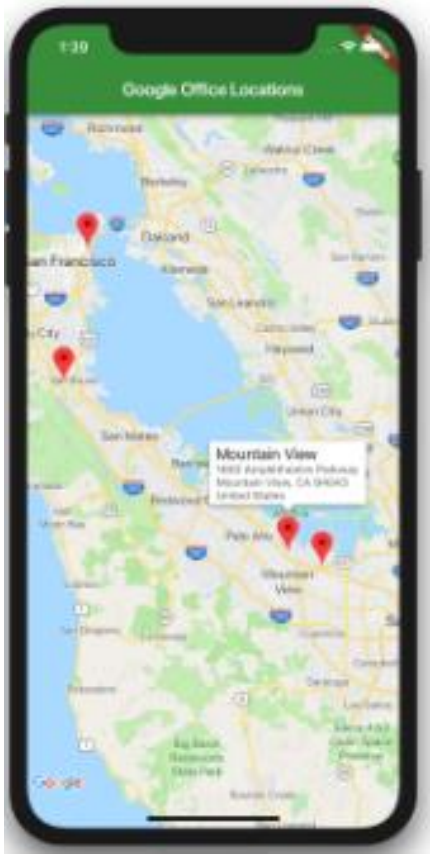

# Google Maps Flutter

- Configuração do Projeto
  - Adicionar nas dependências do google_maps_flutter
    - Arquivo pubspec.yaml

```yaml
environment:
  sdk: ">=2.7.0 <3.0.0"

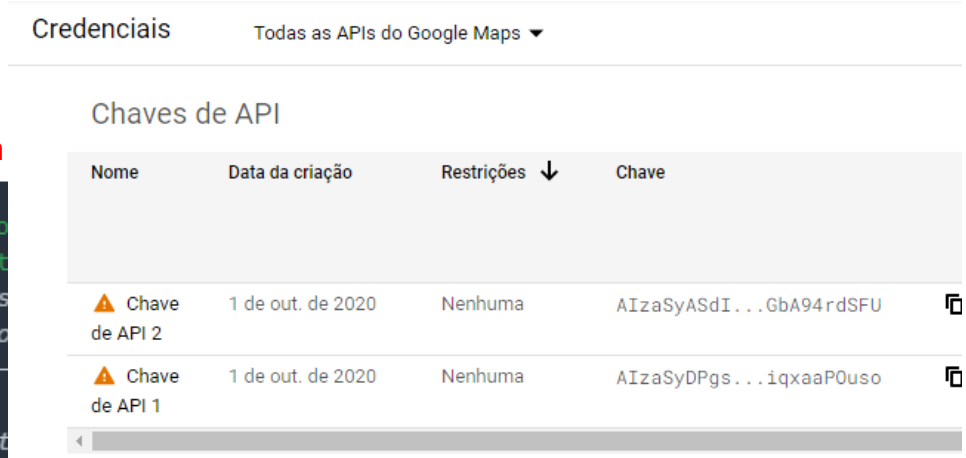

dependencies:
  flutter:
    sdk: flutter
  # Add the following line
  google_maps_flutter: ^0.5.27+3

flutter:
  uses-material-design: true
```

# Google Maps Flutter

- Configuração do projeto para android
  - Adicionar a chave de API do
    - Edite o arquivo AndroidManifest.xml em android/app/src/main

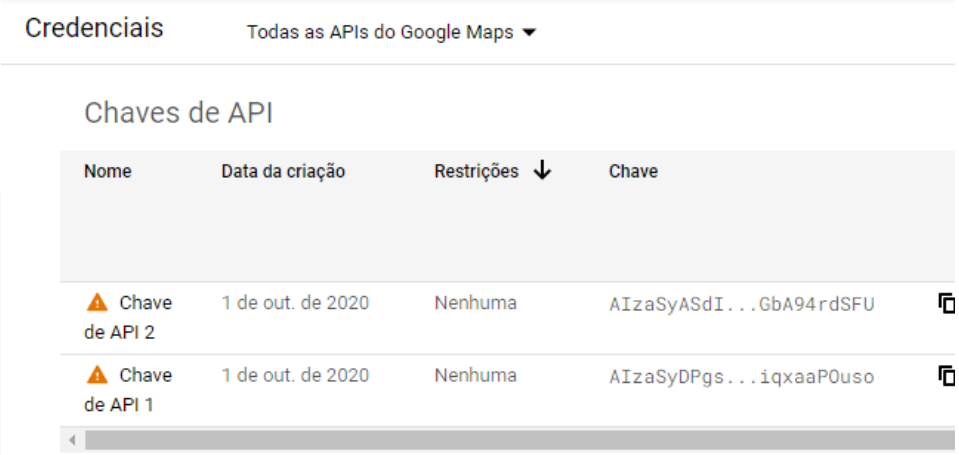

```
<manifest xmlns:android="http://schemas.andro
    package="com.example.google_maps_in_flutt
    <!-- io.flutter.app.FlutterApplication is
         calls FlutterMain.startInitializatio
         In most cases you can leave this as-
         additional functionality it is fine
         FlutterApplication and put your cust
    <application
        android:name="io.flutter.app.FlutterApplication"
        android:label="google_maps_in_flutter"
        android:icon="@mipmap/ic_launcher">

        <!-- TODO: Add your API key here -->
        <meta-data android:name="com.google.android.geo.API_KEY"
                   android:value="YOUR-KEY-HERE"/>
```

# Google Maps Flutter

- Configuração do projeto para iOS
  - Adicionar a chave de API do
    - Edite o AppDelegate.m em ios/Runner/

```objc
#include "AppDelegate.h"
#include "GeneratedPluginRegistrant.h"
#import "GoogleMaps/GoogleMaps.h"

@implementation AppDelegate

- (BOOL)application:(UIApplication *)application
    didFinishLaunchingWithOptions:(NSDictionary *)launchOptions {
  [GMSServices provideAPIKey:@"YOUR KEY HERE"];
  [GeneratedPluginRegistrant registerWithRegistry:self];
  return [super application:application didFinishLaunchingWithOptions:launchOptions];
}
@end
```

# Google Maps Flutter

```dart
import 'package:flutter/material.dart';
import 'package:google_maps_flutter/google_maps_flutter.dart';

void main() => runApp(MyApp());

class MyApp extends StatefulWidget {
  @override
  _MyAppState createState() => _MyAppState();
}
```

```dart
class _MyAppState extends State<MyApp> {
  GoogleMapController mapController;

  final LatLng _center = const LatLng(45.521563, -122.677433);

  void _onMapCreated(GoogleMapController controller) {
    mapController = controller;
  }

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Scaffold(
        appBar: AppBar(
          title: Text('Maps Sample App'),
          backgroundColor: Colors.green[700],
        ),
        body: GoogleMap(
          onMapCreated: _onMapCreated,
          initialCameraPosition: CameraPosition(
            target: _center,
            zoom: 11.0,
          ),
        ),
      ),
    );
  }
}
```

# Atividade

1. Criar um projeto com API Google Maps seguindo os seguintes passos:
   a) Acessar o https://pub.dev/packages/google_maps_flutter e siga os passos
   b) Configure seu ambiente de API no https://console.cloud.google.com/
   c) Configure seu projeto para API Google maps para androi e iOS
   d) Adicione a chave de API no projeto
   e) Envie o link do github ou outro repositório do projeto

# Obrigado
# e até a próxima!
